

Today, JCTI offers students a 'pathway' to the numerous existing tennis opportunities currently available for children to get to the next level. We want to continue to expose our local children to opportunities at black historical colleges where tennis and golf scholarships often go unused. We also want our children to understand that the tennis is an option that can take them a long way and pay off for a lifetime.

Mission and Objectives

The mission and objectives of JCTI is to use the game of tennis to teach youth to:

- Form useful team building and healthy competitive skills that will be key to supporting their personal and academic development as they grow.
- Employ and train youth to develop leadership, and communication skills.
- Help promote healthy lifestyles through sound nutrition and physical activity.
- Promote violence prevention through media.
- Provide funding to help with travel expense for youth participating in tennis tournaments.
